Cool labor book: 'A People’s History of the United States'

If your last serious read of American history was in high school – or even in a standard college course – you’ll want to read this amazing account of America as seen through the eyes of its working people, women and minorities. Howard Zinn (1922-2010) was a widely respected historian, author, playwright, and social activist. In A People’s History of the United States: 1492-Present, he turns history on its head with his carefully researched and dramatic recounting of America and its people – not just its bankers, industrialists, generals and politicians. This book will give you a whole new way of looking at and understanding the world around you. Order it at Union Communication Services.
